Challenges of tracking performance ...

There are multiple challenges practices face when preparing and attesting to their quality performance. Some of the more common challenges include:

- Complex measures require quality program expertise
- Reviewing patient record at the end of the year and entering into spreadsheets
- Missing performance data
- Capturing performance on paper
- Data extract missing important information

Introducing Quality Measure Management

Our new, real-time Quality Measure Management tool gives practices:

- Measure reminders by patient / encounter
- Performance verification and attestation
- Dashboard insights into progress
- Capture numerator/denominator information

Carly Quality
Birthdate 05/05/1947
014-Age-Related Macular Degeneration (AMD): Dilated Macular Examination

Encounter date * **Provider name ***

01/22/2019 Christensen, James

Has the patient had a dilated macular examination, including documentation of the presence or absence of macular thickening or geographic atrophy or hemorrhage AND the level of macular degeneration severity documented during one or more office visits within 12 months? *

Yes, dilated macular examination performed and documented as described within 12 months

Exception - medical reason(s) documented for not performing a dilated macular examination

Exception - patient reason(s) documented for not performing a dilated macular examination

No, dilated macular examination not performed within 12 months, reason not documented

Benefits to your practice

- Take ownership of your quality performance - Focus on measures that make sense for you and your patients
- No need to feel limited by what your EHR supports or what data is easy to extract
- Stop spending hours on performance spreadsheets catching up on six months – 1 year of documentation
- Reminders for performance – don't find out after the fact that you didn't do what was supposed to be done

Benefits to your practice

- Three-click documentation – anyone in the office can do it, no detailed measure training needed
- Document in your EMR the way that makes sense for your practice – don't worry about whether the data will be easy to export
- Real-time dashboard updates of estimated performance – know where you're doing well, where to improve, and where you're behind

The screenshot shows the MingleHealth EMR interface for patient Doris Bass. The sidebar on the left includes navigation options: Dashboard, Tasks, Patients (selected), Users, Resources, and Contact Us. The main content area displays the patient's name, a 'Tasks' tab with 12 items, and a 'Quality' section with several checklist items for diabetes, clinical depression, and medication documentation. Below the quality section is a 'Suggested Services' list with items like 'Initial Preventive Physical Examination', 'Alcohol Misuse Screening', and 'Add Patient's Birthdate'.

How does it work?

Our QMM tool has been designed to avoid workflow disruption. Our simplified approach to documentation allows anyone in the practice to capture and document quality performance at a time and in a process that works for you and your team.

With our toolset, you will be able to proactively capture measure performance:

- At the point of care
- Directly after the patient visit
- Through daily, weekly, or monthly workflows based on practice need
